CAMBODIA’S NO.1 INTERNATIONAL WATER AND WASTEWATER INDUSTRY EXHIBITION & CONFERENCE

12-14 SEPT 2018
DIECC, PHNOM PENH, CAMBODIA

“An excellent show – the very best!”

Endorsed by:
Ministry of Commerce Cambodia

Supported by:
Board of Architects Cambodia

Organised by:
AMBTarsus EVENTS GROUP
As demand for water supply and wastewater management increases to meet household and industrial needs, CAMWATER – Cambodia’s No.1 International Water & Wastewater Production & Treatment Exhibition is the choice destination for water industry professionals to get updated on the latest technology and innovations. CAMWATER 2018 will be returning for its sixth edition at the Diamond Island Convention & Exhibition Centre from 12 to 14 September 2018 to provide the platform for suppliers of water purification, filtration, treatment and management to acquire new equipment and supplies, generate new business, build up their branding and develop new partnerships.

CAMWATER 2018 is all set to gather the water industry’s internationally renowned brands as well as thousands of professionals under one roof, making it an ideal platform for key decision makers of the water industry to meet, network and form business relationships. The expo will also be the perfect setting for those involved with water supply and treatment to source for new ideas, technology, supplies, equipment and services.

Take action today and book your booth at CAMWATER 2018. For more information, please contact Ms. Vichera (vichera@ambtarsus.com) or Ms. Harin (harin@ambtarsus.com) in Cambodia, or Ms Rina (rina@ambtarsus.com) outside Cambodia.

CAMBODIA has chalked up an average of 7% over the past five years and is projected to grow at 6.9% for 2018. However, the rapid urbanisation and industrialisation has put increasing pressure on the supply of potable water. In addition, the government has made wastewater treatment a priority for a range of industries, particularly those related to food & beverage and chemical production. As such, the Cambodian government is currently investing heavily in the water, sewage and sanitation infrastructure in a sustainable way to prepare for both the country’s present and future needs.

CAMWATER 2018 is sure to attract even more buyers and decision makers in the water, building and M&E sector, thereby delivering more value to your participation.

CAMWATER 2018 will be hosting the Cambodian Water Management Seminar, featuring speakers of international repute who will be presenting papers on the advances and innovations in water and wastewater management from other parts of the world. Delegates from water supply companies, regulators, project contractors, NGOs, government sectors, manufacturers and investors are expected to attend the seminar, making it the largest gathering of professionals in the water industry in the country.

Themed “Sustainable Water & Wastewater Management,” the Seminar will focus on discussing viable ways of sustainable water resource management, wastewater treatment and water quality. Exhibitors can request to participate in the seminar and present a paper at the conference. To submit a paper for presentation, please send your title and synopsis to Ms Fatia at fatia@ambtarsus.com.
